**RESOLUTION ON THE SIXTY-SIXTH ANNUAL REPORT OF
THE GOVERNMENT CINCHONA PLANTATIONS AND
FACTORY IN BENGAL FOR THE YEAR 1927-28**

GOVERNMENT OF BENGAL.

Revenue Department.

Cinchona.

CALCUTTA, THE 5TH JANUARY 1929.

RESOLUTION—No. 186 Cin.

READ—

The sixty-sixth Annual Report of the Government Cinchona Plantations and Factory in Bengal for the year 1927-28.

READ ALSO—

The reports of the previous three years.

Dr. J. M. Cowan officiated as Superintendent till the 21st November 1927, when Mr. C. C. Calder resumed charge of his substantive post, and held it till the end of the year.

2. A survey of the plantations referred to in the resolution on the report for the year 1926-1927 was commenced in 1927-1928 through the agency of the Survey of India, but was not completed during the year.

3. Pending the decision of the Government of India on the Report of the Agricultural Commission no action has been taken during the year on the report written by an officer of the Auditor-General regarding the commercialisation of the accounting system of the Bengal Cinchona Department.

4. The area under cultivation at the end of the year was 4,898 acres. Extensions comprising 156 acres were carried out during the year. The coppicing which was carried out some years ago in the upper blocks of the Burmiak division has produced the finest cinchona yet grown in the plantations.

5. Harvests have been confined to thinnings and to the extraction of trees which had died or become unhealthy. Harvests do not reduce the area under cultivation, but as the process of thinning and uprooting dead trees goes on, the area of a block ceases to have any fixed relation to the stock, on the block.

In order to have a staple basis of comparison the unit of stock in reports previous to last year's report was taken as an acre with a full complement of cinchona. This year the Superintendent has reverted to this unit. The figures in Appendix A represent the area of the plantations reduced to acres with a full complement of cinchona. The actual area of the plantations is 4,626 acres, but these represent only 3,162 fully stocked acres.

6. 9,17,259 lbs. of Bengal bark was harvested in the year of report against 6,69,000 lbs. in the previous year.

7. Altogether 11,43,732 lbs. of dried bark was used in the factory during the year. Of this, 8,57,900 lbs. represents the Bengal bark, and the rest Java and Burma bark belonging to the Government of India. The total quantity of quinine sulphate manufactured during the year was 46,485 lbs. at Rs. 2.721 per lb. Of this, 13,195.5 lbs. belongs to the Government of India. Of the total quantity of cinchona febrifuge amounting to 20,899 lbs. manufactured during the year 4,169 lbs. belongs to the Government of India. The cost incurred was Rs. 1.820 per lb. Besides, 289.2 lbs. of other quinine salts at a cost of Rs. 3.8 per lb. and 337.9 lbs. of other alkaloids at Rs. 4.64 per lb. were manufactured.

8. The total of factory products during the year exclusive of converted products was 68,371.3 lbs., of which 51,006.8 lbs. represents the Bengal share and the remaining 17,364.5 lbs. belongs to the Government of India.

9. The total expenditure of the department during the year, including pensionary charges, was Rs. 4,48,244.9.9, and the total receipt exclusive of Rs. 7,692.6.6 from land rent and grazing fees paid into treasury not to the credit of the Cinchona Department was Rs. 5,38,202.5.9. The expenditure was higher by Rs. 58,493.1.3, and the receipts were lower by Rs. 60,449.2.3, than in the previous year.

The increase in expenditure during 1927-28 as compared with that for the year 1926-27 is due to—

(1) Mr. Shaw's drawing full salary in India during 1927-28, whereas in 1926-27 his leave salary for 9 months was drawn in England,

(2) calculation of the pensionary charges under head "Establishments" at $\frac{1}{4}$ th of the total establishment charges during 1927-28 instead of at $\frac{1}{8}$ th as during 1926-27.

(3) increase in stores required for tablet manufacture, installation of double purification plant, increase in expenditure on the carriage of bark and customs duty during 1927-28.

(4) the cost of the survey of the plantations amounting to Rs. 5,000 incurred during 1927-28 by the Director of Eastern Circle, Survey of India,

(5) the manufacture of quinine tablets being carried on throughout the year 1927-28 against six months during 1926-27, and

(6) the adjustment of Rs. 2,300 on account of the cost of the proposed introduction of the commercial system of accounts in the Bengal Cinchona Department.

The drop in receipts is attributed to—

(1) the smaller quantity of quinine sulphate tablets sold during 1927-28,

(2) the fall of about Rs. 26,000 under cinchona febrifuge sale during the year,

(3) the credit of a smaller amount of outstandings, viz., 15,722 during 1927-28 against Rs. 46,511 during 1926-27, and

(4) the fact that the outstandings at the end of 1927-28 are Rs. 4,616 more than at the beginning of the year.

10. Thanks of Government are due to Dr. Cowan, Messrs. Calder and G. E. Shaw, the Quinologist and the other subordinate officers, particularly Messrs. H. Thomas and G. H. Fothergill for their efficient administration of the department.

ORDER—Ordered that this resolution be published in the *Calcutta Gazette* and that a copy with a copy of the report be submitted to the Government of India.

By order of the Governor in Council,

H. C. V. PHILPOT,

Secretary to the Government of Bengal (offg.).

DEPARTMENT OF AGRICULTURE, BENGAL

Forecast of the Winter Til (Sesamum) crop of Bengal, 1928-29.

(NOTE.—On an average of the five years ending 1926-27, the area under til in Bengal has represented some 2·7 per cent. of the total area under til in British India.)

Character of the Season.—In Mymensingh and in some West Bengal districts the weather was not favourable at the sowing time. Subsequent weather conditions favoured the early growth of the crop generally, but heavy rainfall in October caused damage to the mature crop and diminished the outturn in some important districts. On the whole, the season may be regarded as a fair one for the crop.

Acreage.—The total area sown with the crop this year is estimated at 51,100 acres against 50,700 acres last year.

Outturn.—According to District Officers' estimates the outturn of the crop for the province, as a whole, works out at 84 per cent. of the normal against 83 per cent. last year. Taking 6 maunds as a normal rate of yield per acre, the gross outturn for the province is estimated at 9,500 tons this year against 9,300 tons last year, or an increase of about 2 per cent.

ROBERT S. FINLOW,
Director of Agriculture, Bengal.

DEPARTMENT OF AGRICULTURE, BENGAL.

First Forecast of the Wheat Crop of Bengal, 1928-29.

[NOTE.—On an average of the five years ending 1926-27, the area under wheat in Bengal has represented some 0·4 per cent. of the total area under wheat in India. The ratio of the irrigated wheat acreage to total wheat acreage in (a) British India and (b) in the territory now reported on has, in the five years ending 1926-27, averaged (a) 38·5 and (b) 14·0 per cent., respectively.]

Explanatory.—Four forecasts of the wheat crop are published. This forecast deals only with the area sown and the general condition of the crop in its early stages.

Acreage.—According to the estimates of the District Officers, the total area sown amounts to 122,100 acres as against 107,100 and 106,600 acres, reported, respectively, in the corresponding and final forecasts of last year.

Character of the Season.—At the outset the conditions were favourable for preparatory tillage. Sowings in consequence generally took place in the normal time except in some North and East Bengal districts where the operations were a little late owing to excessive rainfall in October. Dry weather in November has been helpful to further sowings and growth of the crop, and the present outlook is reported to be good on the whole.

ROBERT S. FINLOW,
Director of Agriculture, Bengal.

4. The Supervisor may, by notification, prohibit the dropping of anchors or the erection of bamboos or *luggees* in or on any portion of the river or banks, and no anchors may be dropped or bamboos or *luggees* erected at such prohibited sites.

5. No vessel shall be moored at a distance of less than 500 feet from the junction of two or more rivers.

6. Vessels are not permitted to anchor or moor in the restricted portions of the channels maintained by training works.

7. Before entering such restricted channels the person in charge of the vessel must lighten his vessel sufficiently to prevent grounding in the channel.

In the event of any vessel running aground, the person in charge of the vessel must arrange for its immediate release by all means possible, failing which it will be lawful for the Supervisor or his subordinates to arrange to remove such vessel and to recover the costs of such operation from the owner of the vessel as provided for in rule 11 below.

8. No person is allowed to place any obstruction on the river banks so as to impede free passage along them. No person is permitted to place any obstruction in the river bed so as to impede navigation or cause any deterioration of the channel.

9. No person shall wilfully or negligently allow a vessel to sink in the river.

10. In every case of a sunken vessel, whether due to negligence or otherwise, the Supervisor and his subordinates shall offer every assistance in removing the same.

11. If three days after the occurrence of a wreck it is seen that prompt measures are not being taken by the owner to remove the sunken vessel from the line of navigation, the Supervisor and his subordinates shall make their own arrangements for the removal of the same at the expense of the owner, provided that, when the wreck obstructs the fairway, they may take action at once to remove the same.

A notice must be affixed on the wreck when recovered, calling on those concerned to pay to the Supervisor all expenses incurred in the recovery or removal of the wreck, and intimating that if the sum be not paid within fifteen days of the date of notice, the vessel and its furniture, or so much of it as may be necessary for the recovery of the dues, will be sold, the proceeds of the sale being dealt with as directed in section 9 of the Canals Act of 1864.

12. Every Canal Officer is authorized to remove any vessel, anchor, pole or any other thing which he may find in a position in contravention of these rules and to deal with it in such manner as may be necessary to give effect to the rules.

13. Whenever any laden vessel which has been sunk, has been recovered, or when a laden vessel has been seized under the provisions of the Canals Act or of these rules, the Supervisor must give immediate notice of the same to the owner or his agent, calling upon him to remove the cargo without delay and informing him that he will be required to pay all expenses necessary for the proper custody and storage of the cargo until removed.

14. If the Supervisor be unable to ascertain the name and the place of business or abode of the owner of the cargo of any vessel seized under the said Act, he must notify the seizure by advertisement in his office and in at least one public newspaper. Such notice shall require the owner to cause the immediate removal of the cargo and to pay all expenses incurred in providing for its proper custody and storage.

15. The Supervisor may incur whatever expenses are necessary for the proper custody and storage of the cargo of any vessel seized under the Act and, if the cargo be not removed within ten days from the date of seizure, he may sell the same at a public auction to be held in his office or at the place of seizure to the highest bidder, after giving ten days' notice of the auction by advertisement in at least one newspaper.

16. The money realized at such a sale is to be applied, in the first instance, to defray any expenditure that may have been incurred by the Supervisor on account of the cargo sold, and the balance, if any, is to be held in deposit to be paid to the owner of the said cargo on his applying for the same.

17. No officer of any description or rank employed on the river shall, either directly or indirectly, bid for or purchase any article sold under these rules or under the provisions of the Act.

18. Any person (other than the Supervisor or his subordinates), who infringes any of these rules, shall be liable to a fine not exceeding fifty rupees for any one infringement and to an additional fine at a rate not exceeding five rupees a day if the infringement be continued.

2. The draft will be taken into consideration on or after the 1st April 1929, and any objections or suggestions received by the undersigned through the District Officers before that date will be duly considered :—

Draft amendments.

(1) *Delete* rules 15 and 19.

(2) At the beginning of rule 21 *add* the following :—

“On the conclusion of the poll the presiding officer shall open the ballot boxes and scrutinise and count the votes before the candidates or their agents who may be present”.

(3) After rule 20, *insert* the following rules :—

I. Votes shall be given by ballot and in person and no votes shall be received by proxy.

II. (1) The presiding officer shall keep order at the polling station, shall see that the election is fairly conducted, shall regulate the number of voters to be admitted at one time, and shall exclude all other persons except—

(a) the polling officers, the candidates, and one agent of each candidate (hereinafter referred to as the polling agent) appointed in writing by the candidate, and authorized in this behalf by the Circle Officer ;

(b) the police or other public servants on duty ; and

(c) such other persons as the presiding officer may from time to time admit for the purpose of identifying voters.

(2) The presiding officer shall close the polling station at the hour appointed in that behalf under rule 12 and shall not admit any voter thereto after that hour.

III. Each polling station shall be furnished with such number of compartments in which voters can record their votes screened from observation, as the presiding officer thinks necessary.

IV. The presiding officer shall provide at each polling station one ballot box for each of the candidates on which his name shall be written. The box shall also be coloured and numbered and shall also, if the District Magistrate so directs, bear a distinctive symbol, a separate serial number, colour and symbol, if any, being assigned by the presiding officer to each candidate of which notice shall be published at each polling station at least 48 hours before the date of polling, though, if possible, a longer notice may conveniently be given.

V (1). The presiding officer shall provide at each polling station instruments for stamping an official mark on the ballot papers, as many ballot boxes as may be necessary, and copies of the final register of voters, (i. e., the electoral roll) or of such part thereof as contains the names of the electors entitled to vote at such station.

(2) The official mark shall be kept secret, and a period of not less than seven years shall intervene between the use of the same official mark at elections for the same ward.

VI. Every ballot box shall be so constructed that the ballot papers can be introduced therein, but cannot be withdrawn therefrom, without the box being unlocked. The presiding officer at any polling station, immediately before the commencement of the poll, shall show the ballot box empty to such persons as may be present in such station, so that they may see that it is empty, and shall then lock it up, and place his seal upon it in such manner as to prevent its being opened without breaking such seal, and keep it so locked and sealed.

VII. Immediately before a ballot paper is delivered to a voter, it shall be marked on the back with the official mark, and the number, name and description of the voter as stated in the electoral roll shall be called out, and the number of the voter shall be entered in a ballot paper list which shall be in Form A appended to these rules, and a mark shall be placed in a copy of the electoral roll against the number of the voter, to denote that he has received a ballot paper, but without showing the particular ballot paper which he has received. On the ballot list shall be entered the name of the ward and the name or distinctive number of the polling station.

VIII. The voter, on receiving the ballot paper, shall forthwith proceed into the compartment in the polling station and shall put his ballot paper into the ballot box of the candidate for whom he wishes to vote. Every voter shall vote without undue delay and shall quit the polling station as soon as he has put his ballot paper into the ballot box.

[*Note.*—No objection shall be taken to a voter on the ground that he does not want any secrecy in his voting.]

IX. (1) If more than one member is to be elected for any ward, the presiding officer shall give the voter as many ballot papers as there are members to be elected and shall explain to him that each ballot paper must be placed in a different ballot box.

(2) Each such ballot paper shall bear the same serial number.

(3) If the voter places more than one ballot paper in the same box, the votes shall be invalid and shall not be counted.

X. The presiding officer shall give such assistance as may be required to any voter who by reason of infirmity or illiteracy is unable to vote in the manner prescribed.

XI. The ballot paper, which shall be in Form B, shall be serially numbered on the back.

XII. A voter who has inadvertently dealt with his ballot paper in such a manner that it cannot conveniently be used as a ballot paper may, on delivering it to the presiding officer and satisfying him of the inadvertence, obtain another ballot paper in place of the spoilt paper and the latter shall, together with the entry relating to it in the ballot paper list, be marked as cancelled.

XIII. (1) No person shall be allowed to be present at the counting of the votes except the presiding officer and such persons as he may appoint to assist him in counting the votes, and each candidate and one representative of each candidate authorized in writing by the candidate.

(2) No person shall be appointed to assist in counting the votes, who has been employed by or on behalf of any candidate for any purpose whatsoever connected with the election.

XIV. (1) A ballot paper shall be rejected if—

(a) it has not on its back the official mark, or

(b) it bears any mark by which the voter can be identified.

(2) The decision of the presiding officer as to the validity of a ballot paper shall be final.

XV. When the voting papers have been scrutinized and counted, the presiding officer shall forthwith replace them in the ballot-box from which they were taken. He shall also seal up the ballot paper list and unused voting papers. If he is not himself the President, he shall make them over with the ballot-box to the President to be kept in safe custody.

XVI. On the expiry of 30 days from the date of the declaration of the result of the election, the voting papers in the ballot-box and the sealed packets containing unused voting papers and voting paper list in the President's custody, shall be destroyed with the permission of the Circle Officer.

(a) The scheme is designed for a daily supply of 80,000 gallons of water for the present and 150,000 gallons ultimately to 8,000 persons. The source of supply will be the tube well sunk by Messrs. Macneil & Co., who will deliver the water into the municipal main from their overhead reservoir at a height of not less than 40 feet. The municipality will lay distribution mains with hydrants. At the crossing of the river Saraswati the pipe line will be laid under the river-bed.

(b) The estimated cost of the scheme is Rs. 96,700.

(c) The estimated cost of maintenance is Rs. 5,000.

(d) The sum of Rs. 96,700 on account of the cost of the scheme will be met as follows:—

Loan from Government, Rs. 12,000.

House connection fees, Rs. 6,000.

Subscription, Rs. 2,000.

N.B.—The above amended rules will also be applicable to that portion of the Eastern Canals (as defined in Bengal Government notification No. 230, dated the 23rd July 1895) which lies between Bamonghatta and Kulti.

Second publication.

No. 21—The 18th January 1929.—The following draft of rules which, in exercise of the powers conferred by section 11 of the Canals Act, 1864 (Bengal Act V of 1864), the Governor in Council intends to make for the regulation of traffic in the line of navigation known as the Mahananda river (100 miles in length) in the districts of Malda and Rajshahi which has been declared under section 2 of the said Act in Bengal (Government notification No. 10-I., dated the 18th October 1927, published in Part I of the *Calcutta Gazette* of the 27th idem), is hereby published for the information of persons likely to be affected thereby.

II. The draft will be taken into consideration on or after the 10th April 1929, and any objections or suggestions received by the undersigned before that date will be considered:—

Draft Rules.

1. All vessels, when moored, must be made fast by the bow and stern along the bank so as not to obstruct other vessels passing in the river.

2. In such portions of the river where only one towing path exists, vessels must be moored on the off-side and the towing path side kept clear.

3. Only one vessel is allowed to make fast along and in line with the river banks, and no other vessel is to be made fast or to be placed outside of vessels so secured without the special permission of the Supervisor. No vessel or raft is to be placed in such a position as to endanger the safety, or obstruct the passage, of other vessels, and all vessels are to be moored in such places and in such a manner as the Supervisor may at any time direct.

4. The Supervisor may, by notification, prohibit the dropping of anchors or the erection of bamboos or *luggees* in or on any portion of the river or banks, and no anchors may be dropped or bamboos or *luggees* erected at such prohibited sites.

5. No vessel shall be moored at a distance of less than 500 feet from the junction of two or more rivers.

6. Vessels are not permitted to anchor or moor in the restricted portions of the channels maintained by training works.

7. Before entering such restricted channels the person in charge of the vessel must lighten his vessel sufficiently to prevent grounding in the channel.

In the event of any vessel running aground, the person in charge of the vessel must arrange for its immediate release by all means possible, failing which it will be lawful for the Supervisor or his subordinates to arrange to remove such vessel and to recover the costs of such operation from the owner of the vessel as provided for in rule 11 below.

8. No person is allowed to place any obstruction on the river banks so as to impede free passage along them. No person is permitted to place any obstruction in the river bed so as to impede navigation or cause any deterioration of the channel.

9. No person shall wilfully or negligently allow a vessel to sink in the river.

10. In every case of a sunken vessel, whether due to negligence or otherwise, the Supervisor and his subordinates shall offer every assistance in removing the same.

11. If three days after the occurrence of a wreck it is seen that prompt measures are not being taken by the owner to remove the sunken vessel from the line of navigation, the Supervisor and his subordinates shall make their own arrangements for the removal of the same at the expense of the owner, provided that, when the wreck obstructs the fairway, they may take action at once to remove the same.

A notice must be affixed on the wreck when recovered, calling on those concerned to pay to the Supervisor all expenses incurred in the recovery or removal of the wreck, and intimating that if the sum be not paid within fifteen days of the date of notice, the vessel and its furniture, or so much of it as may be necessary for the recovery of the dues, will be sold, the proceeds of the sale being dealt with as directed in section 9 of the Canals Act of 1864.

12. Every Canal Officer is authorized to remove any vessel, anchor, pole or any other thing which he may find in a position in contravention of these rules and to deal with it in such manner as may be necessary to give effect to the rules.

13. Whenever any laden vessel which has been sunk, has been recovered, or when a laden vessel has been seized under the provisions of the Canals Act or of these rules, the Supervisor must give immediate notice of the same to the owner or his agent, calling upon him to remove the cargo without delay and informing him that he will be required to pay all expenses necessary for the proper custody and storage of the cargo until removed.

14. If the Supervisor be unable to ascertain the name and the place of business or abode of the owner of the cargo of any vessel seized under the said Act, he must notify the seizure by advertisement in his office and in at least one public newspaper. Such notice shall require the owner to cause the immediate removal of the cargo and to pay all expenses incurred in providing for its proper custody and storage.

15. The Supervisor may incur whatever expenses are necessary for the proper custody and storage of the cargo of any vessel seized under the Act and, if the cargo be not removed within ten days from the date of seizure, he may sell the same at a public auction to be held in his office or at the place of seizure to the highest bidder, after giving ten days' notice of the auction by advertisement in at least one newspaper.

16. The money realized at such a sale is to be applied, in the first instance, to defray any expenditure that may have been incurred by the Supervisor on account of the cargo sold, and the balance, if any, is to be held in deposit to be paid to the owner of the said cargo on his applying for the same.

17. No officer of any description or rank employed on the river shall, either directly or indirectly, bid for or purchase any article sold under these rules or under the provisions of the Act.

18. Any person (other than the Supervisor or his subordinates), who infringes any of these rules, shall be liable to a fine not exceeding fifty rupees for any one infringement and to an additional fine at a rate not exceeding five rupees a day if the infringement be continued.

DEPARTMENT OF AGRICULTURE, BENGAL.

Final Forecast of the Sugarcane Crop of Bengal, 1928-29.

(Note.—On an average of the five years ending 1926-27, the area under sugarcane in Bengal has represented some 7.1 per cent. of the total area under sugarcane in British India.)

Character of the season.—As indicated in the second forecast, the weather was unfavourable during the early period of growth. Subsequently, since May, conditions were favourable for the development of the crop, although monsoon showers in August somewhat injured prospects. Untimely heavy rain at the time of maturity in October affected the outturn in many districts of the province. On the whole a fair crop is expected.

Area.—The total area planted is estimated at 195,800 acres this year as against 208,900 acres last year.

Outturn.—According to the estimates of District Officers, the average outturn of the crop for the province works out at 81 per cent. of the normal this year as against 83 per cent. last year.

Taking 37 maunds as the normal yield of cane *gur* per acre, the gross outturn for the province is estimated at 215,600 tons this year as against 235,700 tons last year.

Other sources of Gur.—The total quantity of *gur* likely to be obtained from date-palm juice and others is estimated at 102,200 tons this year as against 96,500 tons last year.

The quantity of *gur* for the province from all sources is thus estimated at 317,800 tons this year as against 332,200 tons last year.

Dated Calcutta, the 23rd August 1928.

Memo.—By SIR CHARLES TEGART, KT., C.I.E., M.V.O., Commissioner of Police, Calcutta.

Copy of the following forwarded to the Secretary to the Government of Bengal, Local Self-Government Department.

No. F. B. 2209/165-28, dated Calcutta, the 22nd August 1928.

From—CAPTAIN BERNARD A. WESTBROOK, Chief Officer, Calcutta Fire Brigade,

To—The Secretary to the Government of Bengal, Local Self-Government Department.

(Through SIR CHARLES TEGART, KT., C.I.E., M.V.O.,
Commissioner of Police, Calcutta.)

I have the honour to submit the following report on the working of the Calcutta Fire Brigade for the year ending the 31st March 1928.

2. The year has been a normal one, and no specially serious fires have occurred. The most serious incident of the year took place at No. 2, Brojo Kumar Set Lane on 7th December 1927 at 11-21 p.m., when a comparatively slight fire was attended with loss of life to nineteen persons.

The building was a two-storied wooden building, about 63 feet by 23 feet; the ground floor comprising six small shops, and the upper floor accommodating some thirty-three people who lived in small rooms opening on to verandahs on three sides of the building. This floor was served by a small wooden staircase, about one foot ten inches in width, which was evidently destroyed in the early stages of the fire.

3. In the course of enquiries into the disaster, various breaches of the building regulations were found, and the City Architect to the Corporation of Calcutta remarked in this connection that "the unsuitability of the hut for the purpose of dwelling is clear, and the building is so much at variance with the regulations that it would appear to have been built without sanction, or subsequently altered to individual inclination, which is common."

It appears that effective control over this type of building is not feasible with the present staff available under the City Architect, and it is hoped that the necessary steps will be taken to remedy this state of things. The fire was quickly extinguished, and on searching the building nineteen bodies were found. Prior to this discovery there was no indication or information that people were residing in the building, and there is little doubt that they perished before the Fire Brigade was called. On arrival of the Fire Brigade the building was fully alight from end to end, and had partially collapsed.

It was definitely ascertained that a delay of some ten to fifteen minutes took place before the call was given to the Fire Brigade, although there are numerous telephones in the immediate vicinity, and various street fire alarms within easy reach.

Owing to the lack of observance of building regulations in Calcutta there are many exceptionally dangerous fire risks, and unless supervision in this department is made more effective there is always a possibility of such catastrophes.

4. **Financial statement.**—The statement of receipts and expenditure and payments made by municipalities within the jurisdiction of the Fire Brigade and Licensed Warehouse (Act I of 1893) is given in Appendix I.

5. **Fires.**—The total number of calls for fires or supposed fires was 661, being an increase of 60 as compared with the previous ten years, and a decrease of 188 as compared with the previous year. The latter figure, however, included fires caused by incendiaries during the communal rioting.

6. The number of false alarms given wilfully is 91, being a slight increase on the figure of the previous year. Included in the false alarms of fire given wilfully is one received from a private telephone through the Telephone Exchange, in which instance the Bengal Telephone Company took suitable action. False alarms of this kind are rare. The number of false alarms due to electrical defects (20) is the same as the previous year, and the number due to lightning on telephone circuits has decreased by 11.

7. The calls are classified as follows:—

Fires	520
False alarms, wilful .. .	91
False alarms with good intent .. .	11
False alarms due to electrical defects .. .	20
False alarms caused by lightning on fire alarm circuits .. .	11
Calls for special service (house collapse), etc. .. .	8
	<hr/> 661

On 128 days one fire or supposed fire occurred .. .	128
On 70 „ two fires ditto .. .	140
On 52 „ three fires ditto .. .	156
On 26 „ four fires ditto .. .	100
On 12 „ five fires ditto .. .	60
On 5 „ six fires ditto .. .	30
On 3 „ seven fires ditto .. .	21
On 2 „ eight fires ditto .. .	16
On 1 day ten fires ditto .. .	10
	<hr/> 661

8. The actual number of calls received during the year was 978 as compared with 1,281 during the previous year. These figures include instances where more than one call was received for the same fire, and are given so that the means by which these calls were received can be classified. These calls were transmitted as follows:—

Three hundred and eighty-nine (431 in 1926-27) by street fire alarms; 541 (428 in 1926-27) from private telephones through the Bengal and Government Exchanges; 6 (52 during 1926-27) from Police and direct fire telephones; 22 (38 during 1926-27) by messengers giving information at Fire Brigade stations; 20 (20 during 1926-27) from Fire Brigade look-out men at various Fire Brigade stations.

9. It is satisfactory to note that in seventy cases the first information of fires was received by means of street fire alarms. On the other hand ninety malicious false alarms were received through this system, and in very few cases were the offenders apprehended. Fires occurred in 38 premises licensed under the Licensed Warehouse and Fire Brigade Act I of 1893, as compared with forty-three in the previous year.

10. In 314 cases fires were extinguished by means of first-aid machines, chemical fire extinguishers, buckets of water, by individual firemen, or by the occupants before the arrival of the Fire Brigade; in 73 cases by one motor fire engine, in 41 cases by cutting out switches; in 25 cases by one line of hose from hydrants; in 25 cases by two motor fire engines; in 8 cases by sand: in 7 cases by three motor fire engines; in 3 cases by four motor fire engines; in 3 cases by five motor fire engines, in 2 cases by the fire float, in 2 cases by one motor fire engine and the fire float; in 2 cases by three motor fire engines and hydrants; in 2 cases by four motor fire engines and the fire float; in 2 cases by five motor fire engines and the fire float; in 1 case by sprinklers; in 1 case by one motor fire engine and hydrants, in 1 case by two motor fire engines and private hydrants; in 1 case by one motor fire engine, hydrants and ship's appliances; in 1 case by four motor fire engines and hydrants; in 1 case by two motor fire engines, fire float and hydrants; in 1 case by six motor fire engines; in 1 case by seven motor fire engines; in 1 case by seven motor fire engines and the fire float.

11. **Fire loss.**—The total damage caused by fire and water during the year has been estimated at Rs. 7,66,595, a reduction of Rs. 4,28,317 as compared with the previous year. The average damage per fire is Rs. 1,160 as compared with an average for the last seventeen years of Rs. 2,980. The average fire loss per annum for the last seventeen years is Rs. 13,74,585.

12. The fire loss per fire is classified as follows:—

349 fires	under Rs. 100.
164	„ from Rs. 100 to Rs. 1,000.
43	„ from Rs. 1,000 to Rs. 5,000.
14	„ from Rs. 5,000 to Rs. 20,000.
10	„ from Rs. 20,000 to Rs. 1,00,000.

The following summaries are given in the Appendix:—

District in which fires or supposed fire occurred	..	II
Damage caused by fire, etc., in various districts	..	III
Short reports of fires of Rs. 20,000 damage and over		IV
Number of "Turns-out" from each Fire Station	..	V
Causes of fires and classes of buildings affected	..	VI

13. **Appliances.**—One new motor fire engine of 600-800 gallons capacity fitted with first-aid tank and reel, and a 50 feet telescopic ladder (Ajax) (motor pump No. 18), was placed in commission during the year.

The following is a list of the principal appliances now in commission by the Calcutta Fire Brigade:—

Two motor pumps 600-800 gallons per minute capacity, fitted with scaling ladders, etc. (motor pump Nos. 2 and 18).

Two motor pumps 500-700 gallons per minute capacity, fitted with 55 feet telescopic ladders, etc. (motor pumps Nos. 1 and 15).

Two motor pumps 450-550 gallons per minute capacity, fitted with telescopic ladders, first-aid cylinders and reels, scaling ladder, etc. (motor pumps Nos. 9 and 10).

Headquarters.—Five motor fire engines (Nos. 2, 9, 14, 15 and 16); one motor trailer pump; one motor emergency tender; one motor lorry; two motor cars; 14 hook ladders; 25 scaling ladders; 7 smoke helmets; and 23,000 of 2½ inch canvas hose.

Central Avenue.—Five motor fire engines (Nos. 1, 3, 10, 12 and 18); one 85 feet mechanically operated motor turntable ladder; 7 hook ladders; 12 scaling ladders; 4 smoke helmets; and 12,600 feet of canvas hose.

Chitpore.—Two motor fire engines (Nos. 5 and 7); one hand-drawn steam fire engine; 2 hook ladders and 10 scaling ladders; and 7,125 feet of canvas hose, one 60 feet turntable ladder.

Howrah.—Two motor fire engines (Nos. 6 and 8); one hand-drawn steam fire engine, 1 hook ladder; 9 scaling ladders; and 6,375 feet of canvas hose.

Garden Reach.—One motor fire engine (motor pump No. 11), 4 scaling ladders and 3,200 feet of canvas hose.

It is estimated that the motor appliances travelled 10,636 miles during the year to and from calls.

14. Fire stations.—Appendix V gives the number of times each fire station has been turned out in response to fire calls, together with monthly statements.

Fire Brigade headquarters is still located in rented premises in Corporation Place. Negotiations are now in progress for the acquisition of a suitable site, and it is hoped that new headquarters will be provided at an early date as the present premises are most unsuitable, and have not the accommodation required for either the staff or the pumps.

In this connection a reserve building fund is being created by placing a sum of money annually to this fund, and at present Rs. 1,20,000 is invested in 5 per cent. Government Bonds.

Owing to the provision of extra fire stations and alterations to one existing fire station no provision has been made for this fund during the forthcoming year.

The fire risk in the Nintolla and Burra Bazar areas continues to increase, and the congestion of traffic in that part of the city frequently delays fire engines *en route* to fires.

A serious fire occurred in the timber yard area, Nintolla, in March 1927, and as a result a special committee was appointed to consider what precautionary measures should be adopted to minimise the existing risks.

Meetings were held in August and December 1927, and at the latter meeting I submitted a comprehensive list of precautions which should be adopted in regard to the timber yard.

I concur with the recommendation of the committee that a Fire Brigade station with two motor fire engines and accommodation for the necessary crews should be provided in the immediate locality, and accordingly endeavours have been made to find a suitable site. Land is very difficult to obtain in this part of the city, but it has been ascertained that a site can be hired from the Commissioners for the Port of Calcutta on P. C. Tagore Ghat Road, and negotiations in this connection are now in progress.

Financial considerations render the provision of a new station improbable in the immediate future, but I have submitted a scheme for a temporary station on the site referred to. This station will house the fire appliances required, and the necessary crews will be sent from the existing station at Central Avenue, each crew doing a cycle of duty, and being provided with quarters at Central Avenue Fire Station.

The staff proposed for this station is two drivers and twenty men including jemadars, and provision will be made accordingly in the budget for the forthcoming year.

15. Owing to the increase of fire risks in the Howrah and Sibpur area it has been decided to motorise the existing fire station at Sibpur. This station was originally built for a hand machine, and in order to provide accommodation for a motor fire engine it is necessary to extend the station.

Plans of the necessary alterations have been made, and the cost of the project is included in the budget for the forthcoming year. When the station is in commission, the protection of Howrah and the surrounding district will be greatly improved, especially as delay may occur at any time in sending fire engines from the Calcutta stations should the bridge across the river Hooghly be open for river traffic. The station will operate in conjunction with the district station in Howrah.

Negotiations are also in progress for the acquisition of land in Kalighat and Palmer's Bazar areas for the erection of fire and ambulance stations. It is hoped to include provision for the same in the budget of 1929-30.

16. Industrial and other fire risks in both these areas are rapidly increasing and the provision of extra fire protection is now vital.

17. **Staff.**—The strength of the Brigade during the year was 224 as detailed below :—

One Chief Officer, 1 Second Officer, 1 Chief Engineer, 5 Station Officers, 8 Engineers, 7 European firemen, 1 Warehouse Inspector, 3 clerks, 1 store-keeper, 3 telephone operators, 2 carpenters, 2 lathe mistries, 1 fitter, 1 blacksmith, 1 head tindal, 15 tindals, 155 khallasis, 2 bhistis, 4 mehtars, 3 peons, 1 moochi and 6 Indian drivers.

The conduct and discipline of this force throughout the year has been excellent.

18. **Fatalities and accidents.**—Appendix VI gives short reports of fires involving loss of life or serious accidents.

During the year under review the number of lives lost was 31 as compared with 9 during the previous year. The increase is due to the serious loss of life which occurred on 7th December 1927 (as noted at the commencement of this report) and to two cases of suicide by burning included in this number; 17 persons were injured at fires as compared with 33 during the previous year.

First-aid was rendered where necessary by the Fire Brigade, and the injured persons conveyed to hospitals by ambulances.

19. **Water-supply.**—Considerable benefit has been derived from the provision of the new electrically driven pumping machinery at the Mullick Ghat and Watgunge Pumping Stations, and shortage of water in the areas supplied by mains is now a somewhat rare occurrence, except where the mains are of too small a capacity. This occurs in various growing localities where the original small mains have not been replaced by mains of adequate diameter.

There have however been occasions when the machinery has had to be closed down for the purpose of relaying mains, repairing burst mains, hydrants, etc., and during such periods there is very grave risk of serious fires occurring. Improvised arrangements have had to be organised by the Fire Brigade, and fortunately such arrangements have so far been successful in dealing with any fires which have occurred, but the possibility of serious conflagrations occurring during such periods gives rise to considerable apprehension.

It is regrettable that more sluice valves for the purpose of dividing up the water system into different areas are not provided. Under existing conditions when it is required to make repairs, the whole system has to be closed down, or the water pressure reduced to a minimum. The time taken to increase the pressure at the pumping station and before the benefit of the same is felt at a fire is appreciable, and on various occasions shortage of water has been experienced particularly at the commencement of a fire, when low pressure only has been maintained at the pumping stations.

Schemes for relaying the mains are now in progress, and, when completed, will undoubtedly be beneficial.

20. The provision of Water Inspectors by the Corporation has had the effect of preventing a certain amount of waste owing to unauthorised persons opening hydrants for the purpose of obtaining water, and neglecting to turn off the supply again. Much remains to be done as there is a considerable amount of waste constantly occurring. Total prevention of this waste will enable the Fire Brigade to obtain a much more efficient supply of water during operations at fires.

21. The condition of hydrants also requires attention. It is no unusual occurrence for the Fire Brigade to arrive at a fire and find the nearest available hydrants out of order. This entails much delay in getting to work, and causes unnecessary fire damage.

22. Regarding the provision of a system of fire mains in the Chitpur-Cossipur area I regret to have again to report that no water is available in this area save that obtained from various tanks in the locality. These tanks are being filled up on sanitary grounds and for building purposes, and water shortage is a matter for serious concern. Chitpur-Cossipur abounds in serious fire-risks and there is every possibility of very large fires occurring. I understand that a scheme for the provision of a water-supply in this area is under discussion; and that definite action may be taken at an early date.

23. The water scarcity at Howrah gives ground for the greatest apprehension and the situation has been pointed out to the authorities of that municipality on numerous occasions. Nothing has however been done. Ponds are few and far between in this locality, and many of these are being filled up and it is now no unusual event to use as many as two hundred lengths of hose, each 75 feet long, to obtain a supply for fire extinguishing. The situation in this area is rapidly becoming impossible.

I feel convinced that if a water-supply scheme is not provided there is every likelihood that conflagrations will result, and whole districts will be devastated. At present should a fire gain headway there is insufficient water to extinguish it. It is remarkable that more serious fires have not occurred in this area during the past few years. The locality is becoming more congested, and fire-risks are becoming more numerous and more grave. I can only add that the seriousness of the situation has been emphasised for many years.

24. **Fire float.**—The fire float (5,000 gallons per minute capacity) is stationed on the river opposite Princep's Ghat, and was turned out on ten occasions during the year.

25. **Street fire-alarms, telephones and electrical communications.**—I am pleased to be able to report that all street fire-alarms, telephones, etc., have been maintained in a satisfactory state of repair and efficiency by the Bengal Telephone Company, and the thanks of the Fire Brigade are due to the telephone operators and the staff of the Company for their prompt attention and ready assistance at all times.

Three hundred and eighty-nine calls were received over the fire-alarms system. This system is most advantageous in transmitting calls direct to the Fire Brigade and is now thoroughly appreciated by the public. On many occasions requests have been received from the residents in various localities to have a fire-alarm erected in the vicinity, and such requests receive due consideration and attention.

The large number of false alarms given wilfully by misguided individuals over the fire-alarm system is a matter of regret and considerable concern. Undoubtedly such persons do not realise that whilst the fire engines are away from their stations on vain errands, they are not available to respond to genuine calls, and consequently if the number of false alarms increases the number of fire engines and firemen will have to be increased proportionately. I regret that few of the offenders have been arrested.

26. **Inspection Department.**—Theatres, cinemas and places of public amusement are inspected by an official of the Corporation of Calcutta under the Municipal Act. Many Indian theatres are badly designed, and the construction is bad; overcrowding frequently takes place, and I would emphasise here the necessity for stricter adherence to the Corporation bye-laws for theatres. Generally speaking the European theatres and cinemas are reasonably safe so far as the risk from fire is concerned.

27. In connection with the Licensed Warehouse and Fire Brigade Act I of 1893, 6,991 inspections of warehouses have been made during the year. Four hundred and forty-seven applications and complaints have been attended to and disposed of. One hundred and fourteen prosecutions were made under section 14 of Act I of 1893, which resulted in 48 persons being fined, amounts aggregating in all Rs. 1,115; 8 persons being warned and discharged, 11 persons were acquitted, 9 cases were withdrawn and 38 cases were filed, no trace being found of the accused.

28. **General.**—The Calcutta Fire Brigade protects the city of Calcutta and the Municipality of Howrah, and may attend fires outside the boundaries of the above (not exceeding a radius of 6 miles from the central fire station), provided appliances can be spared, on payment of a prescribed fee. The total area protected is approximately 120 square miles.

29. **Ambulance Department.**—The Motor Ambulance Department has done excellent work during the year under review, and there is no doubt that it is greatly appreciated by the public in general. Its activities are rapidly increasing, and no less than 16,708 calls were

received during the past twelve months. It is unsatisfactory to note that there was unnecessary delay in responding to 897 calls owing to the fact that all the ambulances were engaged on other calls. Usually the delay amounted only to a few minutes as ambulances were sent on to these calls immediately on their return to their stations, but it is hoped that the strength of the department will be materially increased at no distant date so as to obviate any delay of this nature.

Owing to no beds being available in hospitals there was delay in disposing of 1,265 cases, and now before ambulances are sent out for cases of ordinary sickness in houses, the person requiring the ambulance has to make previous arrangements for accommodation in hospital.

The figures quoted above include instances where persons have been picked up on the streets and taken to hospital. It is no unusual occurrence to have a case in an ambulance for several hours going from hospital to hospital in search of a vacant bed.

Street beggars have been a great nuisance to the department. No less than 1,776 hours have been occupied in dealing with cases of this class.

Appendix VIII gives a brief summary of the work done, and Appendix IX gives the rules governing the department.

The staff consists of 10 drivers and 20 attendants with 12 motor ambulances. Several of these machines have been in commission for eight years and now require to be replaced by new ones.

The department is financially maintained by the Government and the Corporation of Calcutta.

The receipts during the year amounted Rs. 3,127 and the total expenditure was Rs. 67,950. The contribution from the Government was Rs. 11,500 and the balance of Rs. 53,323 was paid by the Corporation of Calcutta.
